

No.	Question	Main Purpose	Supporting References
1	What is your full name, date of birth, age, and biological sex?	Patient identification and age/sex-specific medication dosing.	Bates' Guide to Physical Examination; Johns Hopkins Medical History Questionnaire; Indiana University Health Adult Patient History Questionnaire
2	What are your current height and weight?	Weight-based dosing and BMI calculation.	WHO STEPS Instrument; Johns Hopkins Medical History Questionnaire
3	Who is your primary healthcare provider and which pharmacy do you usually use?	Medication verification and continuity of care.	Johns Hopkins Medical History Questionnaire; AHRQ MATCH Toolkit
4	Please list all prescription medications you are currently taking.	Drug–drug interaction detection.	AHRQ MATCH Toolkit; Gleason et al.; Mueller et al.; Johns Hopkins Medical History Questionnaire; Indiana University Health Questionnaire
5	Please list any over-the-counter medicines , vitamins, herbal products, or dietary supplements you currently use.	Detect interactions involving non-prescription products.	AHRQ Medication Reconciliation; Tam et al.; WHO STEPS; Indiana University Health Questionnaire
6	For each medication, specify the name, dose, frequency, route, and reason for taking it .	Accurate medication reconciliation and interaction analysis.	AHRQ MATCH Toolkit; Gleason et al.; Mueller et al.; Indiana University Health Questionnaire
7	Have you recently started, stopped, or changed any medication? If yes, please provide details.	Detect recent medication changes that increase interaction risk.	Greenwald et al.; AHRQ Medication Reconciliation
8	Do you have any allergies to medications, foods, latex, iodine, or contrast dyes?	Prevent allergic and hypersensitivity reactions.	Johns Hopkins Medical History Questionnaire; Indiana University Health Questionnaire; Joint Commission National Patient Safety Goals

9	If you have allergies, what reaction occurs (e.g., rash, swelling, breathing difficulty, anaphylaxis)?	Assess allergy severity and clinical significance.	Johns Hopkins Medical History Questionnaire; Joint Commission
10	Have you ever experienced a serious side effect or adverse reaction from a medication?	Prevent repeat adverse drug events.	AHRQ Medication Reconciliation; WHO Medication Safety resources
11	Has a healthcare professional ever diagnosed you with heart disease, high blood pressure, diabetes, kidney disease, liver disease, asthma/COPD, thyroid disease, stroke, cancer, hepatitis, HIV/AIDS, stomach ulcer/GERD, or sleep apnea ?	Identify diseases that influence medication selection and contraindications.	Johns Hopkins Medical History Questionnaire; Indiana University Health Questionnaire; WHO STEPS; Bates' Guide
12	For each diagnosed condition, approximately when were you diagnosed?	Determine disease duration and progression.	Johns Hopkins Medical History Questionnaire
13	Have you ever been hospitalized? If yes, what was the reason and when?	Identify serious illnesses and previous treatments.	Indiana University Health Questionnaire; Patient History Questionnaire (Rich Koerner); Bates' Guide
14	Have you had any surgeries? If yes, list the procedure and year.	Surgical history may affect current medication management.	Johns Hopkins Medical History Questionnaire; Indiana University Health Questionnaire
15	Have you ever had complications with anesthesia or previous medications during surgery?	Identify perioperative medication risks.	Johns Hopkins Medical History Questionnaire
16	Do any of your close blood relatives have diabetes, heart disease, hypertension, stroke, kidney disease, thyroid disease, or cancer?	Assess inherited disease risk relevant to medication decisions.	Johns Hopkins Medical History Questionnaire; Indiana University Health Questionnaire; Patient History Questionnaire
17	Do you drink alcohol, smoke or use tobacco products?? If yes, how often and approximately how much?	Alcohol interacts with many medications.	WHO STEPS; CDC BRFSS; Patient History Questionnaire, Johns Hopkins Medical History Questionnaire

18	Do you use recreational drugs or injectable drugs?	Recreational drugs may interact with prescribed medicines.	WHO STEPS; Johns Hopkins Medical History Questionnaire; Patient History Questionnaire
19	Are you currently pregnant, breastfeeding, or planning pregnancy? (if applicable)	Pregnancy and lactation affect medication safety.	Bates' Guide; Johns Hopkins Gynecological History; WHO recommendations
20	Have you ever been treated for depression, anxiety, or another mental health condition?	Mental health medications have important interaction profiles.	PHQ-9 literature; GAD-7 literature; Johns Hopkins Mental Health History
